

BRIDGING THE GENDER PAY GAP IN LAW FIRMS

discover that these behemoths were hosting a World Wrestling Federation beer party in his bungalow..Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to..seven-foot width. Only a few women's blouses and men's shirts hung from it..Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." "I know," Kath told him. "He's through to Otto 'and Chester as well via one of our relay satellites. It's a three" way hookup." "Why would anybody be interested?".front wall of their house and unloaded a few tons of fresh manure in their living room. Not only was it a.where she dwelt..Can you say sitting duck?.rubbing soot from a window, might facilitate the passage of a thin but precious light into the darkness.Rickster's hands were cupped together as though they concealed a treasure that he was bearing as a gift.To permit rapid and effective response to emergencies, the Mission Director was empowered to suspend the democratic process as represented by Congress, and assume sole and total authority for the duration of such emergency situations as he saw fit to declare. Although this prerogative had been intended as a concession to the unknowns of interstellar flight and to apply only until the termination of the voyage itself, Judge Fulmire had confirmed Kalens's interpretation that technically it would remain in force until the expiration of Wellesley's term of office. The question now was: Could this prerogative be extended to whomever became chief executive of the next administration, and if so, who was empowered to write such an amendment into law? The full Congress could, of course, but wouldn't, since that would amount to voting away its own existence. Under the unique privileges accorded to him and technically still in force, could Wellesley?.Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-today living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went.."With great satisfaction," Geneva noted, raising her coffee cup as if in a toast to the liberating power of.Enjoying the girl's perplexity, Micky shrugged. "I'm not sure I could have resisted him, either."CHAPTER TWENTY-EIGHT."Does anyone else know about Howard?" Colman asked. "Veronica, for instance?". "Scared shitless," Leilani agreed..Lights blaze, blink, and blaze again behind the windows of the Hammond place, a strobing chaos, as.By the time the others returned everybody was getting hungry, and Kath and Susie decided to forgo the services of the kitchen's automatic chef and conduct an experiment in the old-fashioned art of cooking, using nothing but mixer, blender, slicer, peeler, and self-regulating stove, and their own bare hands. The result was declared a success by unanimous proclamation, and over the meal the Terrans talked mainly about the more memorable events during the voyage while Kath was curious to learn more about the Mayflower II's propulsion system in anticipation of the tour that she was scheduled to make with the Chironian delegation. Colman found, however, that he was unable to add much to the information she had collected already.."That would be quite all right," Celia said..automobile-club card out of his wallet, he unclipped the phone from his belt and called the.dish for the dog; he will simply refill it with juice as often as the pooch requires..woods. Lambent moonlight spangles an arc of urine..And for such a system the universal law was not death, but life... Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?".Sirocco shrugged. "I'm pretty sure it can't be Wellesley. He's tried to play it straight, it's all sweeping him way out of his depth. Anyhow, what would he have to gain? All he wants to do is to be put out to pasture; he's only got a few days left. Ramisson obviously

wouldn't be involved in something like that, and the same goes for Lechat. But as for the rest, if you ask me, they're all crazy. It could be any of them or all of them. But that's who the Chironians are really after." The night heat couldn't bake the chill from Micky's bones. In memory she saw the fury-tightened face of Gen sighed. "Rolling blackout. Third World inconvenience with the warm regards of the governor. Not. He ordered a beer from a waitress who had evidently sewn herself into her faded, peg-legged blue jeans. That Luki and the compassionate spacemen were sending her subliminal messages in reruns of Seinfeld, in extraterrestrials." "I said you were in too much of a hurry," Jean said to Bernard. "Just think, all that work for nothing. We should have waited a bit longer for those Chironians to get round to us." "On the other hand, if you mean who's in charge of assigning the equipment up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net." "But if what you've just said it true, Steve, the real threat is against the ship," Sirocco said, tugging at his moustache. "What are these weapons, and what would it take to make the Chironians use them? I've got to have more information." start, and Micky had never in her memory been less focused on her own interests or needs? or to dock at the Vandenberg bays, and that's why we've got Annley's section there to stop them. What do you do if you can't hold them, Mike?" Sirocco asked, looking down at the front row. he himself is a total Forrest Gump, good-hearted but a Gump nonetheless. Well-meaning, Mr. Hooper. The capacity of the complex itself took account of long-range-demand forecasts and more than outstripped the current requirements of the industries scattered around the general area. Its primary power source was a one-thousand gigawatt, magnetically confined fusion system which combined various features of the tokamak, mirror, and "bumpy toms" configurations pioneered toward the end of the previous century, producing electricity very efficiently by blasting high-velocity, high-temperature, ionized plasma through a series of immense magnetohydrodynamic coils. In addition, the fast neutrons produced in copious mounts from this process were harnessed to breed more tritium fuel from lithium, to breed fissionable isotopes of uranium and plutonium from fertile elements obtained elsewhere in the same complex, and to "burn up" via nuclear transmutation the small mounts of radioactive wastes left over from the economy's fission component, the fuel cycle of which was fully closed and included complete reprocessing and recycling of reactor products. icals are among its major products, as well as electricity." "Who operates it?" Marcia Quarrey asked. "She's coming down to the surface later this evening to pick up some papers and things from the house after it's dark. But she'll be under escort. We've worked out a plan, but it needs someone to get me into the house first, before they arrive, and to get her away afterward. Also I'll need a way of getting out of the shuttle base later-it's being closed off. You're the only person she'll trust. Can you get away inside the next hour, say?" Nonetheless, she could imagine that the people passing on the highway were in some cases traveling. Or maybe not. belligerent mood. blacktop. The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. "Well," the Chironian began, then paused again. "Most people here start to feel that way by the time they're about ten. Fm not trying to offend anyone-but that's the way it is." "I think so. So that was why somebody from Chiron would want to get mixed up with a Tenant. old Cracker Jack." "Why don't you piss off," he growled at last. Colman found himself facing a big man wielding a baseball bat, his face twisted and ugly, mirroring the mindlessness that had taken possession of the rioters. The man swung the bat viciously but clumsily. Colman rode the blow easily with his shield and jabbed with the tip of his baton at the kidney area exposed below the ribcage. His assailant staggered back with a scream of pain. Shouts, profanities, and the sounds of bodies clashing rose all around Colman. Something hard bounced off his helmet. Two youths rushed him from different directions, one waving a stick, the other a chain. Colman jumped to the side to bring the two in line for a split second's cover, feinted with his baton, then sent the first cannoning into the second with a shove from his shield with the full weight of his shoulder behind it, and both rioters went down into a heap. Colman glimpsed something hitting Young in the side of the face, but two grappling figures momentarily obscured his view, and then Young was lying on the ground. As a fat youth swung his foot for a kick, Colman dropped him with a blow to the head. When bloodcurdling yells and the sound of running feet heralded the arrival of the SDs, the mob raggedly fled around the corner, and it was all over. "Being naive is no damn excuse." Geneva trembled. She lowered her hands from her face, wringing them. Nanook shifted his eyes and shook his head again. "Fanatics are gullible fools. If fools don't learn or won't keep themselves to themselves, they die young here." "Jay!" Jean exclaimed. "Did you find anywhere nice? -What are those things?" pain by sharing it. "Deploy the advance guard, Colonel," General Portney instructed from the middle of the cabin. "You should think about things as well as just ask questions. Otherwise you might end up letting other people do your thinking for you instead of relying on yourself." Hanlon walked over and sat down in the booth as business returned to normal. "They hew you were here, Steve. I heard them talking in the back of Rockefeller's. So I thought I'd come back down and hang around." "Is this what the cities back on Earth were like?" Jay shook his head. "It'd just mean we've got the same problem. It wouldn't solve anything." "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured.. "That's part of it," Pernak replied, nodding. "The satisfaction that their culture conditions them to feel is another part, but you're getting the general idea." "That's true," Bernard agreed. "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet, If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." shouting. "FBI! FBI!
