She must have been a starlet in the Twenties or Thirties, but success had eluded her. So she had tried to freeze herself in time. She still expected, at any moment, a call from The Studio. But her flesh hadn't cooperated. Her hair was the color of tarnished copper, and the fire-engine-red lipstick was painted far past her thin lips. Her watery eyes peered at me through a Lone Ranger mask of Maybelline on a plaster-white face. Her dress had obviously been copied from the wardrobe of Norma Shearer..he'd passed..splendid effects by Ray Harryhausen, and starred John Richardson as Tumac and Raquel Welch as Luana, both of them being pretty spectacular special effects themselves. Add to this an appropriately grim but beautiful setting of endless rock wastes and lava flows, a mysteriously evocative moment in what seems to be the sacred cave of a lower form of man, and a beautifully original score consisting mostly of rocks struck together. As you may gather, it's one of my favorite schlock movies..They flew every day, they had the feel for it. They were tops." She slumped back into her chair. "L38." "What do you mean?" Lee Killough has written a series of superior stories for F&SF that share a common theme (the future of the arts) and background (an artist's colony called Aventine). The tales are completely separate entities and may be enjoyed on their own. This one concerns the visit to Aventine of Selene and Amanda, two different personalities that snare the body of one beautiful young woman.. blindness could miss the Vancian cynicism or the massive Dunsanian irony (sometimes spilling over into. without wearing suits or carrying airberries." . that evening? to catch a bus to San Diego, to visit his ailing mother. Colman checked, touching the screen with a finger to indicate the place where the bottom of the trail emerged from a small wood on the edge of a grassy fiat and just a few hundred feet from the enemy bunker. "We have been studying this problem for some time now, and we believe there is a solution. It would not be feasible to send a contingent of adult humans, either as a functioning community or in some suspended sate, with the ship; it is in too advanced a stage of construction to change its primary design parameters. But then, why send adult humans at all?" He. spread his arms appealingly. "After all, the objective is simply to establish an extension of our race where it would be safe from any calamity that might befall us here, and such a location would be found only at the end of the voyage. A flicker of darkness, light again, and the ship is gone. He turns back again until he finds it standing out under light canvas past Sandy Hook. Manipulating time and space controls at once, he follows it eastward through a nickering of storm and sun?loses it, finds it again, counting days as he goes. The farther eastward, the more he has to tilt the device downward, while the image of the ship tilts correspondingly away from him. Because of the angle, he can no longer keep the ship in view from a distance but must track it closely. November 21 and 22, violent storms: the ship is dashed upward by waves, falls again, visible only intermittently; it takes him five hours to pass through two days of real time. The 23rd is calmer, but on the 24th another storm blows up. Smith rubs his eyes, loses the ship, finds it again after a ten-minute search..He continues to shout and I don't answer. On the stage Nagami and Hollis look at each other and at the rest of the group, and then Moog Indigo slides into the last number with scarcely a pause.
