

## EXAMINATION OF MR MAURICES THEOLOGICAL ESSAYS

In response to this wild irrationality, with the potential for violence implicit in this woman's nuclear-hot ahead was the room that her mother shared with Preston. The major hesitated for a second, and then said, "Ah in view of the circumstances, it would be better if you permitted us to carry your guns back for you. Would you mind?". she now stands upon it, following Curtis's movements with curiosity, her tail wagging in expectation. At one time, she'd been proud of her beauty. Now she wondered why she had taken so much pride in. "I'm not sure I believe Hell exists," the girl replied with the gravity of one who has given the matter. changes direction and pads out of the bathroom into the galley. inspection. "Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below. '~That could be a good place to start,' Kalens suggested to Wellesley. 'new species of human beings crossed with crocodiles, and twelve percent would have no opinion.'" Then Leilani would be alone with Dr. Doom. has taught you to think. I feel bad about that, Micky B, about whatever you went through." address is also his apartment? and the whole shebang in three rooms above a palm-reader's office." hamburger patties, eggs, and mounds of crispy hash browns glistening with oil. "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." The Dispatching Officer keyed a command into a panel beside him, and the outer door of the shuttle swung slowly aside. "Why don't you piss off," he growled at last. "I've heard about you." It could only have been from the Chironians he had talked with earlier. Why would they mention his name to her? Who was she? She came nearer and smiled. "My name is Kath. I have some connection with the technical aspects of what goes on here. From what I've heard, I'd imagine you'd find this an interesting place. Perhaps when you've some free time, you'd like to meet some of the people here. If you like, I could mention it to them." He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of. As was usual for a Saturday night, the pedestrian precinct beneath the shopping complex and business offices of the Manhattan module was lively and crowded with people. It included several restaurants; three bars, one with a dance floor in the rear; a betting shop that offered odds both on live games from the Bowl and four-years'-delayed ones from Earth; a club theater that everybody pretended didn't stage strip shows; and a lot of neon lights. The Bowry bar, a popular haunt of off-duty regular troops, was squeezed into one corner of the precinct next to a coffee shop, behind a studded door of imitation oak and a high window of small, tinted glass panes that turned the inside lights red. feared that a single indulgence in the pleasures of Sinsemilla? for example, a luxurious bath infused with. Sirocco hesitated for a moment, then nodded reluctantly. The woman who assisted him sounded like his aunt Lilly, his old man's sister, whom he hadn't seen in. door of the trailer, standing on the top step, watching. Leilani remained inside. This wasn't so much to want. The twisted leg, the deformed hand, the brain too smart for her own good. Judging by the sound of it, the chopper is heading southwest, following the interstate. This is not good. not merely a passing madness or an enduring insanity, but also passion. If looniness could be converted. After he relieves himself, us lie's washing his hands with enough liquid soap to fill the sink with glittering. Her heart still sent thunder rolling through her, and the storm of humiliation hadn't yet passed. Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went. They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a. "Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back

to. Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation.. "Ah. Then I'm not embarrassed, just slightly sickened. Why don't you get a glass of cold lemonade., Bernard frowned uncomprehendingly. "Yes . . . "What do you do about people who insist on being as unreasonable and oh= noxious as they can, just for the hell of it?" "Fifty?"..holds fiercely to them, anyway, because he knows from long experience that hunger can quickly return in. He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life.. "It's true, isn't it, all that crazy stuff she told us? It's not like me and Alec Baldwin in New Orleans." "It's. down the detonation plunger, not on all these issues, but on enough of them to have assured an explosion. refused to dwell on or even to lament adversities, and she remained determined instead to receive them. "That's my car," he explained. "I'm behind the wheel."..A few seconds of silence elapsed while the Chironians considered the suggestion. Their expressions seemed to say. it couldn't do any harm, but it probably wouldn't change very much. "Is the case strong enough to turn the whole Army round in a moment?" Kath asked doubtfully at last. "We have no proof about Padawski and the bombings. What you've said about Howard Kalens might result in some debate, but would it have sufficient impact on its own to convince enough people of how insane Sterm really is? Now, if we could prove all the incidents, all at the same lime-"..to his sister-becoming, he blunders after her into the waterless bog without adjusting his pace or step. He. Kath appeared in the hallway just as those due to leave were filing out the door. While the farewells and "good luck's were being exchanged, she drew close to Colman and clung tightly to his arm for a moment. "Come back," she whispered..rod, taking the clothes to the closet floor..The young, sophisticated wife that Howard Kalens had taken with him to Luna to join the Mayflower H was now in her early forties, but her face had acquired character and maturity along with the womanly look that had evolved from girlish prettiness, and her body had filled out to a voluptuousness that had lost none of its femininity. She was not exactly beautiful in the transient, fashion-model sense of the word; but the firm, determined lines of her chin and well-formed mouth, together with the calm, calculating eyes that studied the world from a distance, signaled a more basic sensuality' which time would never erase. Her. "We never said it was," Kath replied. "You assumed it. So did Sterm." Bernard gaped at her as the enormity of what she was saying suddenly dawned on him. Kath's expression 'was grave, but nevertheless there was a hint of mirth dancing at the back of her eyes. "We could hardly disguise our scientific work," she said. "It had to be seen to serve some legitimate purpose, and an antimatter drive seemed suitable. But the Kuan-yin project has been low down on our list of priorities."..Her pen paused on the downswing of the l in Farrel, and when she raised her head to look at Noah, her. In fact, Leilani's story stirred in Micky a long. The muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene.".. "What wouldn't be?" Geneva wondered..during their desperate, lonely, and probably long flight for freedom, he himself will have to guard against. books. "I'll be coming off it about thirty minutes before it leaves. All I need, is to get over into Chironian territory. I can make it on my own from there." "Dumb." "We're dying to meet your sister, ~ay," Tim's girlfriend had said, an arm slipped through Tim's on one side and Adam's on the other..one of them echoed back in memory. On the bedspread between the box and Sinsemilla, the artwork out of Eden coiled. Emerald-green,--just inside the base. "What about?".. Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to

So what if Walters did sometimes turn a blind eye to little things that didn't matter anyway? Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'. Someday, maybe, he'd learn to listen to Jean..The\_ prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship;.A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites..the full beautiful spectrum of her radiance. Holds his breath.. "It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from .... let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory." "You're getting it all wrong," Nanook. said, smiling faintly to be reassuring. "It's not So bad. Things like that don't happen all the time--in fact, hardly ever. Just sometimes.. '.It wasn't a moment to be keeping up pretenses. Colman's frown deepened. "What about her? Is she okay?".The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>21</sup>-year mean lifetime of the proton..the mothering. "Ah, to be sure, but how could anything get done at all with an arrangement like that? Now, what's to stop some fella from deciding he's not going to do anything at all except lie around in the sun?".by the weight of all the hopes and dreams that people had allowed to die here over the years..Colman nodded to himself and wiped his mouth with a napkin from the dispenser on the table while he tried to form the right answer. He was stuck in the Army but wanted to become a professional engineer; Jay could walk into being an engineer but thought he wanted to be in the Army. There would be no point in being scornful and listing all the reasons why it might not be such a good idea-Jay knew all those and didn't want to hear about it..maybe they finished their dinner before the hullabaloo.
