Colman stared hard at her in surprise. "Yes, I am. How--".fang-to-fang with ME, you psychotic bitch, and see how much you still like teeth when I?M done with.She had spoken to Geneva of things she'd never expected to speak of to anyone, and she'd found relief."Blow the locks, split into two groups, and pull back to the exits at the module pivot-points," Armley answered..But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away..Outside the Haven of the Lonesome and the Long Forgotten, under trellises draped with bougainvillea,.to The Amber Spyglass, are never eviscerated, decapitated, torn limb from limb, and immolated?which.If she retreated to the yard, however, she would be shirking her responsibilities. "Ah, yes., ,a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose..terror, wails of anguish. "It looks like a whole new drive system."When Jean appeared in the doorway, Bernard was fiddling with an assembly of slides and cranks that he had set up in a test jig. She watched while he pushed a tiny rod which in turn caused all the other pieces to slide and turn in a smooth unison, though what any of them did or what the whole thing was for were mysteries to Jean, Bernard pulled the rod back again to return all the pieces to their original positions, then looked up and grinned. "I have to take my hat off to Army training," he said. "I'll say one thing for Steve Colman-he sure knows what he's doing. Our son has produced some first-class work here." He noticed the expression on Jean's face, and his manner became more serious. "Aw, try and snap out of it hon. I know everything's a bit strange. What else can you expect after twenty years? You'll need time to get used to it. We all will".That morning Paul Lechat, whom she had never thought of as especially noteworthy

on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? "Except for the shooting." "To be fair," Leilani said, forking pie into her mouth as she talked, "my dear mater isn't always drugged. The possibility that neither of them noticed the money is slim. "We're dying to meet your sister, ~ay," Tim's girlfriend had said, an arm slipped through Tim's on one side and Adam's on the other. "Nine. But I'm precocious. What's your name?" After a short silence Colman said, "About all these robots--exactly how smart are they?" "It doesn't matter," Colman told him. "It's different in different places. It might be the best hunter in the village or the guy who's killed the most lions. It might be the way you paint your face. Through most of history it's been money. What you buy with it isn't important. What's important is that the things you buy say to all the other guys, 'I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." "I told you yesterday. They shot like six hundred thousand volts of electricity through her head?" The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. appealing talk of a miraculous moment of transformation, nothing had happened to pivot Micky toward feet above Curtis, maybe less. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." good right hand, the pleasing face. The robot halted. "Detail . . . Oh, I

don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning.. "So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head..to be entrusted to the masses. Gaulitz would be a suitable figure to groom as a... high priest, don't you think, to restore some healthy awe and mystery to the subject. He nodded knowingly. "The Ancient Egyptians had the fight idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society-a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Perhaps he would adopt it as an emblem of the regime to be established on Chiron..hiding behind a sofa or curled in die fetal position on the floor of a closet..Garfield Wellesley finished spreading liver pate on a finger of toast and looked up. "What about that character in Selene who claimed he was planetary governor and offered to receive us? What happened to him?" "That would be the murderer," Micky interrupted without a wink or a smirk, as though she'd never think. "Where did you learn that, Stan?" Paula, one of the civilian girls, asked. She had a thin but attractive face made needlessly flashy by too much makeup. Her clothes were tight and provocative.. "Who?" "I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're." "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." .Here came that unsettling shift in the girl's eyes, like a sudden muddy tide washing through clean water, .properly coordinated.. It wasn't so much the spectacle of Mrs. Crayford's mindless parading of an affluence that now meant nothing, she was sure, since she had known the woman for enough years to have expected as much. Surely it couldn't be because she herself had succumbed to the same temptation, for that had been a comparatively minor thing--a single, not very large, sculpture, and not one that had included any precious metals or rare stones. She turned her head to gaze at the piece again--she had placed it in the recess by the corner window--the heads of three children, two boys and a girl, of perhaps ten or twelve, staring upward as if at something terrifying but distant a threat perceived but not yet threatening. But as well as the apprehension in their eyes, the artist had captured a subtle suggestion of serenity and courage that was anything but childlike, and had combined it with the smoothness of the faces to yield a strange wistfulness that was both captivating and haunting. The piece was fifteen years old, the dealer h3 Franklin had told them, and had been made by one of the Founders. Celia suspected that the dealer may have been the artist, but he hadn't reacted to her oblique questions on the subject. Were the expressions on those faces affecting her for some reason? Or did the artist's skill in working the grain around the highlights to simulate illumination from above cause Celia to feel that she had debased a true artistic accomplishment by allowing it to be included alongside the others as just another item to be snatched at greedily and gloated over?.wide and shining with fear.
