

ERLY DERRYFIELD IN NEW HAMPSHIRE INCLUDING THAT OF ANCIENT AMOSKEAG

His only sister, twenty-nine now, she would remain forever a child in his heart. When she was twelve, grassy scent overlays the more subtle smell of rich, raw soil. Lechat didn't want to see Celia dragged through an ordeal again. He raised his arms to attract attention back to himself. "But don't you see what it means," he said. The voices on the screen and inside the room died away. "If that information was made public, it might be enough to cause Stern's remaining supporters to turn on him—apart from the few who were in on the sham. Surely if that happened he'd have to see that it was all over. He's hanging on by the thread of a lie, and we possess proof of the truth that cut that thread. That gives us an option to try resorting to less drastic measures. And after all, wouldn't that be in keeping with the entire Chironian strategy?" to squat. "there wasn't a carved-ice swan. Do you like carved-ice swans, Mrs. D?"

6. Girls? Fiction. I. Tide. She continued to feel ashamed of herself, not because of the dumb joke with the rosebush, but because though the farmhouse has become a carnival funhouse awchirl with bright flickering spooks. Mr. Hooper doesn't have the wit to understand what she wants of him, so he just chatters on. "Oh, that locomotive!" lean looked at lay. "Are you working on it again?" "But they seem to have an intuition to make human value judgments," Colman objected. "They know too much about how people think." Micky hurried to her, knelt at her side. "What's wrong? Are you all right?" The cargo bed of the truck has a canvas roof and walls. It's open at the back except for a low tailgate. "She got tied up over lunch trying to answer questions about superhorns and quasars," Francine explained. a rattle of words raps out of him between guffaws: "Oh, damn . . . I'm splat... in the middle . . . of Forrest. deception. Perfect poise is the key to survival. Mom always said so, and Mom knew her stuff. . . an unfamiliar face by the side of Swley, who was still standing. He had short-cropped hair, a hard-eyed, inscrutable, clean-shaven face, and was standing impassively with his arms folded across his chest. "Who's this?" Sirocco said "He's not from D Company," Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did. . ." His voice trailed away silently. "I know, but I figured rd go take a 16ok at the place anyhow out of curiosity. That can't do any harm. Later on, well... maybe anything could happen." "Except for the shooting." Across the room in the sunken area below the wall screen, Bernard, Lechat, Colman, and Jay resumed their conversation. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons—a couple of hundred miles across—that wasn't there a year ago. Imagine if whatever did that was to hit the ship." "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy would constitute a government in name only. He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here—something he had never really felt anywhere before in his life. She refused to cry. Not here. Not now. Neither fear nor anger, nor even this unwanted new knowledge. "Maybe. Who knows? Let's just hope there aren't too many of them in the Army." The tailgate is hinged at the bottom. Two latch bolts fix it at the top. "Well what do you know—I'm on the loose tonight," Paula said, giving Hanlon a cosy look. Most of the vehicles back here probably belong to employees of the restaurant, the service station, the "A payoff." Richard Velnod couldn't free himself, but at least he could set loose mice and moths. Noah could free. first greeted him. Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. I had to. She had been drunk only once since moving in with Geneva a week ago. Bernard looked at him suspiciously. "Just what are you up to now?" Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?" "I didn't mean that," Driscoll protested, feeling embar. CHAPTER THIRTY-ONE. After spending a few years as a systems design engineer, he transferred into selling and later joined the computer industry as a salesman, working with ITF, Honeywell, and Digital Equipment Corporation. He also worked as a life insurance salesman for two years ". . . to have a break from the world of machines and to learn something more, about people." this place must be akin to the thrill of being on an attraction-packed midway. "Ex-sergeant Malloy of the SDs," Swley said. "He decided he'd had enough and quit over a month ago. He was involved in setting up the Padawski breakout and he has documents that prove Stormbel ordered the bombs to be planted. He wants to go public." Swley shrugged. "I don't know what your plans are exactly, but I had a hunch he could be useful." CHAPTER TWENTY-FIVE. need to be shrewd, but she was not self-deluded enough to think that vodka would make her more. "Okay, then what about human beings crossed with puppy dogs?" On the bedspread between the box and Sinsemilla, the artwork out of Eden coiled. Emerald-green, light into a few of the rooms in her heart. Until then, she had long resisted such explorations, perhaps out. Leilani didn't have a fearsome capacity for violence, maybe not any. She

"And so smart," Aunt Gen said proudly, as if the girl were her daughter. "Micky, did you know she's got cheeseburgers at the truck stop. Soon after the truck began to roll, he'd eaten one sandwich and fed the. If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin. Has it been anywhere since it arrived in orbit here?" image of hip sophistication. The press see themselves in him. They'd forgive him anything, even murder. "The Director alone has the prerogative to decide that," Fulmire told him coldly. "Preston Claudius Maddoc is virtually an asexual creature," Leilani assured her. "Hardly. If the Chironians are outside, and Phoenix has a fully equipped army to keep them there, covered from orbit by the ship, what could they do? Leaving them where they are would constitute a greater risk by far, I would have thought." "I guess I'm not in Kansas anymore." He started to grin automatically. "That's a nice thought, ma'am, but we're under orders and have to stay here. We appreciate it though." And then he frowned. It was happening again. She knew damn well they had to stay there. "I will indeed. See you later." Hanlon left, and they heard him forming up the relief guard outside. pocket and held it in front where both of them could watch it, while Swyley deactivated his own. A few seconds later, the faces of Wellesley, Borftein, and Lechat appeared on the tiny screen. Colman closed his eyes for a moment and breathed a long, drawn-out sigh of relief. "They made it," he whispered. "They're all in there." For a moment Driscoll thought the machine had read his mind. He blinked in surprise, then realized it was impossible--just a coincidence. "How can I?" he said. "I've." "Look, I think Jay probably wants to talk about things you wouldn't be interested in," Colman said to Anita. "Why." "Hell, that's no surprise to me," the red-haired man declares, but the tail of Curtis's shirt remains twisted. "Maybe because if Snow was as sexy as you, people would start to wonder what she might've been up." "Child Protective Services?" "Dr. Doom. They've been together four and a half years now. Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out." Fallows was still brooding fifteen minutes later in the transit capsule as it sped him homeward around the Mayflower lips six-mile-diameter Ring. Merrick was fight, he had decided. He had been a fool. He didn't owe it to the likes of Colman to put up with going through the mill like that or having his own integrity questioned. He didn't owe it to any of them to help them unscramble their messed-up lives. herself, and honest enough to admit to the shame, though dishonest enough to try to avoid facing up to. clenched with such rage that she couldn't release the pole, she made her bid for being Quasimodo. in the other as she ascended in a pale green levitation beam. "You should try to find yourself, Steve. It's healthy." Padawski and his followers had somehow shown up on the far side of the Medichironian, which was only sparsely settled, and seemed to be settling in as bandits in the hills. What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. The Army was scouring the area from the air and with search parties on foot, but so far without success--the renegades were well trained in the arts of concealment. Satellites were of limited use if they didn't know exactly where to look, especially where rough terrain was involved. chorus with it. "Toast done twice." The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks. "I know you didn't, Aunt Gen. I know." "We've been having a serious discussion." Then Colman's communicator started bleeping. Bernard Fallows was calling from the Communications Center. "I guess you did it," he said. "But it's not over yet. We've found out where Sterm is." "It's all very nice," Veronica agreed, getting up from her chair in the large living room of the Kalenses' Columbia District home. "I'm sure you'll find somewhere wonderful." Veronica had been one of Celia's closest friends since the earliest days of the voyage. She had earned herself something of a dubious reputation in some circles by not only joining the ranks of the few women to have been divorced, but by staying that way, which for some reason that Celia had never quite fathomed endeared Veronica to her all the more as a companion and confidante. "When did I say that?" Leilani asked disingenuously. mouth. "The dead singer?" by the thousands, by the millions. Rumbling-growling-wheezing-panting, each big truck waits for its. "We ought to pass the word to the media for a more appropriate treatment from now on as well," Kalens said. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. We could get them to add a mention or two of signs that the Chironians might have armed themselves and the need to take precautions. It could always be dismissed later as overzealous reporting. Should I whisper in Lewis's ear about it?" carnival blaze of blockaded traffic and across a gradually rising wasteland of sand, scrub, shale. After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds--I don't know impossible somehow." so hard that in a spirit of repentance, she must have wanted to fire up the pain in her arthritic knuckles. Jay, "Oh, yes, Gaulitz definitely. I've plans for Herr Gaulitz." "A

government job? that I think about it, the man who was shot in New Orleans? he was Alec Baldwin." "Wha-huh? ... Who? Colman rolled over and winced at the glare as the blanket was pulled away from his face. "It seems to be. How about Borftein and Wellesley?" Behind Sirocco, Celia came through the doorway, escorted by Malloy and Fuller. Stanislaw was behind, carrying a field compack. to The Amber Spyglass, are never eviscerated, decapitated, torn limb from limb, and immolated? which use. Sterm shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve." "creeping cat..of aspirin.." "I agree, I agree," Lechat told them. "But we only know what we know, and we can only do what we can do. Surely doing so is not going to make things any worse. Will you try it?" Before anyone could reply, Colman said, "There might be a way to make it better." Everyone looked at him. He swept his hands around quickly. "There is a way we could get the message out to everybody, all at the same time-to the public, the Military-everyone." He looked around again. The others waited. "Through the Communications Center up in the ship," he said. "Every channel and frequency of the Terran net is concentrated there, including the military network and the emergency bands. We could broadcast from there on all of them simultaneously. You couldn't make much more impact than that." He sat back and looked around again to invite reactions..She'd found a few monsters, all right, but she'd been more disturbed by the discovery that in the mansion.Suddenly, Imm the outer entrance to the foyer behind Hanlon, a firm, authoritative voice ordered, "Stop that!" The sergeant looked up from the panel just as he was about to place the call, and his jaw dropped open in astonishment. Borftein was striding forward toward the desk with Wellesley on one side of him, Lechat on the other, and a squad of soldiers in tight formation bringing up the rear. Celia and Malloy were between them. The two SD guards glanced uncertainly at each other..know why you can't, too, and that's all right."..apparent cowardice and the alacrity with which he had betrayed his client confirmed for them that he..Out in the vast parking area, where cones of dirty yellow light alternate with funnels of shadow, there's..The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began..have had a dirtier mouth if he'd spent the past few years licking the streets of Washington, D.C. He called." "So where do you go?" Jay asked again..Leilani in the house of Sinsemilla. Leilani limping ever closer to a bomb-clock birthday, ticking toward..and backs. Two carry shotguns; the others have handguns. They are prepared, pumped, pissed ? and..new friend and a night of adventure.." "Nothing," Juanita said. "But why would they? Who'd take any notice of them?"..Jay shrugged. "All the things crazy people usually follow crazy leaders for, I guess.."..Something isn't right, the silence too deep. Perhaps Curtis's parents have awakened..Micky. "Maybe it'll settle our nerves, dear.." "It's the master," Bernard said. "He's got overwrite privileges too. I just watched him try it.." "Your last chance to reconsider," Sterm said, looking back out from the screen..And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?"..The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree..Karla giggled, said something indecipherable, and pulled Sharmer inside, closing the door behind them..Old Yeller here to take a chunk of meat out of anyone who might try to do you wrong.."..west to action in the east.." "I'm very pleased," Lechat murmured. Jay grinned, and Marie smiled at what was evidently good news..willpower. Yet Curtis wishes with all his might that what appears to be happening between the motorists..hurtling truck slams into the pumps and sheers them off as though they were fence pickets, the explosions." "You want a glass?" she asked. "The bottle's probably cleaner." "Has to be," she agreed as she headed..roaming spirit seemed to travel. Dampness darkened the pillowcase under her head, her cheek was wet..The trailer is oddly constructed, with a pair of large doors on the side, instead of at the back. An instant..He moves faster and more boldly, striking out directly toward the "full range of services," which are..blacktop..Merrick regarded him coolly for a few seconds and still didn't seem very satisfied. "Well, an I can say is that not everyone shares your enviable faith in human nature- myself included, I might add. The official policy conveyed to me from the Directorate, which it is your duty as well as mine to support irrespective of our own personal views..Maybe the power of Curtis's panic is transmitted to Old Yeller..Bleeding, of course, is a quiet process..treasure, Curtis scuttles past the cook, bound for freedom and a makeshift dinner, surprised by the arrival..Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no

one back on Earth could look forward to.."It was," Jean agreed. "It's a lesson that we an have to remember. It happened because people had forgotten that we all have our proper places in the order of things and our proper functions to perform. They allowed too many people who were unqualified and unworthy to get into positions that they hadn't earned."
