Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby.."Sometimes names are destiny. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out..".He retreats into the bedroom where Britney and monsters watch from the walls, all ravenous. Switches."It's not subject to finite arithmetic," Pernak agreed. "But why does it have to be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take something from infinity, and you've still got infinity left." He shrugged. "It's consistent. I know it sounds crazy to us, but it fits with the way they think". "Isn't that a Hawaiian name?" Micky asked.."Ye-es," Bernard said slowly, nodding to himself. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him..".She had settled in a chair at a nearby writing desk. Opening her small purse, extracting a checkbook,.Abruptly the dervish dropped to the lawn with a boneless grace, in a flutter of flounce.."How's it coming along?" Pernak asked.."Nothing wrong with having fun," said Leilani. "One of the things I believe, if you want to know, is that.Who're you running from, boy?..".four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would

probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..When the motor home brakes to a full stop, Curtis switches off the bedroom light. The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him.. "I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? What a bandit would hope to achieve on a world like Chiron was hard to see, but revenge against Chironians seemed to have a lot to do with it; two isolated homes had been invaded, ransacked, and looted, in the course of which five Chironians and one soldier had been killed, Three Chironians, including a fifteen-year-old girl, had been raped. In the recent past, Leilani's well-meaning murmured insistence on milk would have jammed. Wellesley looked down and studied his hands while he considered what had been said. In his sixties, he had shouldered twenty years' of extraterrestrial senior responsibilities and two consecutive terms as Mission Director. Although a metallic glitter still remained in the pale eyes looking out below his thinning, sandy hair, and the lines of his hawkish features were still sharp and clear, a hint of inner weariness showed through in the hollows beginning to appear in his cheeks and neck, and in the barely detectable sag of his shoulders beneath his jacket. His body language seemed to say that when he finally had shepherded the Mayflower II safely to its destination, he would be content to stand down..This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport.
